

System developer Nordic Growth Market

Nordic Growth Market (NGM) is an authorized Exchange operating in Sweden, Norway, Finland and Denmark. NGM also provides exchange system technology for AktieTorget and BX Swiss exchanges. The company was founded in 1984 and is today a wholly-owned subsidiary of Börse Stuttgart, the leading retail exchange in Germany. NGM offers a complete marketplace for exchange traded products and listed companies.

What we are looking for;

A couple of developers, senior and junior.

What we do;

We develop trading systems for financial exchanges (stock markets etc).

At a glance:

- Transaction intensive (100,000+ tx/s) with low latency (< 1 ms) and high availability
- Mission critical, used by major banks
- Java, network programming, failover

Job description;

The position offers a broad spectrum of exciting technical challenges ranging from tricky details to designing of brand new features. The development group at NGM is a small but highly focused group that fancy getting things done.

Our clients, exchanges and some of the world's largest banks and market data vendors, rely on our systems running at high performance and without interruptions. These are challenging conditions if you fancy advanced technical problem solving!

Working with the trading system includes tackling problems in different areas of;

- Java SE, no external frame works, core system, clean, uncomplicated, single threaded design.
- Network programming (sockets) with standardized protocols such as FIX and FAST.
- Transaction intensive systems with low latency and high availability.
- Linux, Jenkins, Artifactory, etc.
- Client development (GUI and web) occurs.

The work is divided between development of new features and maintenance of the existing code stack.

Experience for a senior position;

- Design and development of transaction intensive systems
- Several years of Java development
- Network programming

Experience for a junior position;

We look more towards the real ability of our colleagues than formal merits and formal experience, there are however a few formal requirements that we expect from you.

- The equivalent to about two years of full time development in Java SE, C/C++ or similar.
- Some experience from working with network programming.

As a person;

- You love to code.
- You are responsible.
- You keep things simple.

To sum things up, if you are curious about working at NGM and if you are a curious and cheerful person with the ability to efficiently deliver clean simple solutions to complex problems – we would like to get in touch with you! Or maybe you just have other valuable skillsets that you believe will suit us equally well?

Other information;

Extent: Full time

Salary: According to agreement

Location: Central Stockholm, Sweden

Information: If you have any further questions regarding the job description or the recruitment process, send your question to work@ngm.se

Application: Please submit your application to work@ngm.se
